Wrenco Arms proposed usage.

Wrenco Arms has been in the North Idaho area for over 15 years and at it's current location since 2009. The plan for moving to Ponderay will expand the current retail store into a full service store and indoor firing range. Service we will be providing at the new location in Ponderay will be retail of all shooting sports related equipment, from ammunition, shooting accessories, reloading equipment, camping/survival gear, and of course firearms.

We will continue to have armorers and a gunsmith on staff that repair and customize firearms and anything else that someone wants to personalize. This customization includes certified applicators in Cerakote, which not only provides the best corrosion and abrasion resistance on the planet but personalizes the item with multiple colors, designs, and patterns. We can do coatings on anything from firearms, sunglasses, golf clubs, exhaust, etc etc.

The indoor range is insulated and minimizes the sound from within the confines of the concrete and baffled lanes. At the indoor range we will be able to offer club shoots, day lanes, and firearm rentals to draw in local and tourism customers who do not have opportunities to safely try these types of firearms. After hours we are hoping to offer access to law enforcement agencies for either practice or qualification times that may not be open to them during winter months or low light shooting practice that doesn't affect the public during quiet hours.

Hours of operation.

We are hoping to be open 6 days per week with one day as a maintenance or training day. More than likely we will be open from Tuesday to Sunday, with proposed hours of Tuesday to Saturday 9-7 and Sunday 11-5.

Dust abatement:

During construction and after completion we will be hiring a water truck or vehicle to spray either water or calcium (or approved chemical) as needed to keep dust down in the construction area as well as the parking lot after completion.
