Attn: Dust Control Measures

Re: Site Plan Application for Hotel

Project Address: A portion of parcel RP00000037302A (Approx. 3 acres). Lot to be created via separate application.

During civil work and dirt work operations we will have a water truck on site to spread water with a water bar or hose. During mechanical demolition of buildings, if needed, we will control dust with a hose. Other operations such as concrete cutting, etc. utilize wet cut methods to limit dust.

Let me know if you need any other information.
